EDUCATION

B.S., Information Management

Western Illinois University
2000 — 2004

CREDENTIALS

- FINRA Registered Representative
- Capital Partner, Belvedere Trading (2011 — Present)

SKILLS

Low-Latency Trading

Exchange Colocation · FPGA · Layer 1 Switching · PCAP Capture · GPS Time Precision · PTP / NTP · Tick-to-Trade Measurement · Kernel Bypass

Networking & Infrastructure

BGP · Multicast · Arista · Juniper · Cisco · Palo Alto · Data Center Ops

Operating Systems & Virtualization

Linux · Windows Server · AlmaLinux / CentOS / RHEL · macOS · VMware · Citrix · oVirt

Automation & Observability

SaltStack · Puppet · Splunk · Nagios · Grafana · Telegraf · SmokePing · Claude

Programming & Scripting

Python · Bash · Perl · PowerShell · SQL · BigQuery · Flask · HTML / CSS

Trading Systems

OptionsCity · Trading Technologies · ProOpticus · Orc · Actant · Bloomberg

Data & Storage

MariaDB · PostgreSQL · MSSQL · InfluxDB · OneTick · SAN / NAS

Leadership

Team Management · Project Management · Budgeting · Contract Negotiation · Strategic Planning · Mentorship

SUMMARY

Director of IT Operations & Infrastructure with 20+ years building and leading the technology behind a top-tier proprietary options trading firm. Owner of the firm's production trading environment and the teams that keep it running, with deep experience across low-latency networks, exchange colocation, FPGA-accelerated trading, and the automation and observability that make it all reliable. Capital Partner at Belvedere Trading since 2011.

EXPERIENCE

Director, IT Operations & Infrastructure

2018 — Present

Belvedere Trading, LLC · Chicago, IL

- Oversee Infrastructure, Release, Support, and Trading Desk Technology teams.
- Steward the firm's low-latency edge: exchange colocation, Layer 1 switching, FPGA-accelerated trading platforms, line-rate PCAP capture, and GPS-disciplined time precision.
- Produce annual budget forecasts, authorize expenditures, and negotiate multi-year service contracts.
- Manage firm-wide projects spanning trading systems, exchange connectivity, and operational risk.

Infrastructure & Support Lead

2014 — 2018

Belvedere Trading, LLC · Chicago, IL

- Led the team responsible for the firm's trading desks, internal users, and core infrastructure.
- Introduced proactive monitoring and SLA reporting that improved uptime and time-to-resolution.
- Embedded external trading groups into Belvedere's environment, accommodating diverse software stacks and exchange access requirements.

Capital Partner

2011 — Present

Belvedere Trading, LLC · Chicago, IL

- Invited into the partnership in January 2011 in recognition of long-term contribution to the firm.
- Participate in firm-level strategy, risk, and growth discussions.

Business Intelligence Team Lead

2010 — 2014

Belvedere Trading, LLC · Chicago, IL

- Launched the Business Intelligence function from the ground up.
- Normalized data across proprietary software systems to deliver reporting metrics and trading desk dashboards.
- Built a complete employee review platform used by 175+ employees.

EXPERIENCE (CONTINUED)

Systems & Network Administrator

2007 — 2010

Belvedere Trading, LLC · Chicago, IL

- Started as sole desktop support resource handling application support, systems and network administration, and telecom.
- Managed 400+ endpoints across six sites in mixed Linux and Windows environments.
- Operated HP servers and Force10 (Dell) / Arista switching with a focus on low-latency performance — exchange colocation, Layer 1 / cut-through switching, GPS-disciplined NTP/PTP time sources.
- Built PCAP capture and tick-to-trade measurement to quantify network and application latency end-to-end.
- Implemented and supported options trading systems including OptionsCity, ProOpticus, Orc, Trading Technologies, and Actant.

Level II Desktop Support & Special Projects

2005 — 2006

Peoples Gas Company, LLC · Chicago, IL

- Promoted to the Special Projects group after six months.
- Led the mobile command center initiative and a company-wide infrastructure upgrade.

SELECTED IMPACT

Workflow Automation

Designed and shipped the Belvedere Software Authorization System, Employee Management System, and Employee Change Notification platform.

Low-Latency Trading Edge

Drove the firm's colocation footprint across major options exchanges, delivered Layer 1 cut-through switching, FPGA-accelerated market data and order entry, line-rate PCAP capture, and GPS-disciplined PTP/NTP time distribution.

Internal Tooling Suite

Delivered company directory, crypto positions tracking, interview rooms coordination, Belvedere office maps, and automated authorization workflows driven by org-chart updates — including market data entitlement and software access request approval automations.

Performance Monitoring

Built custom monitoring, PCAP-based tick-to-trade measurement, and load-testing tooling to surface latency regressions and inefficiencies before they affected trading.

Datacenter & Office Build-outs

Led 10+ datacenter and office migrations, moves, and expansions across multiple offices and trading venues.

Environment Segmentation

Implemented secure development and production environment separation to safeguard trading systems from unauthorized access.
